FACULTY ENDORSEMENT

I am writing to endorse
Angela Martinez
(Student No. 202203002)
for the peer tutoring
program.
Angela is a 3rd year BSIT
student who has been
under my instruction for
two consecutive
semesters.

Courses completed
under my supervision:

Data
Structures
& Algorithms

Excellent

Angela
possesses a
strong
analytical
mind. In
database
systems, she
demonstrated
mastery of
SQL queries,
normalization,
and entity-
relationship
modeling. In
data
structures, she
excelled at
implementing
linked lists,
trees, and
graph
algorithms
with clean,
readable code.

What
distinguishes
Angela from
her peers is
her teaching
instinct. On
multiple
occasions, I
have observed

her voluntarily staying after class to help struggling students debug their code. She does not simply provide answers — she walks them through the logic until they understand independently. Her patience and problem-solving approach make her a natural fit for tutoring.

Additional competencies I have noted: critical thinking, time management, clear communication, and teamwork.

She is organized, punctual, and takes her academic responsibilities seriously.

I endorse this application

with full
confidence.
Angela is
qualified to
tutor database
systems and
data
structures at
the peer level.
