RE: Endorsement of Simone Dominique Makinano (23063670) for Peer Tutoring

Good day,

This letter serves as my formal endorsement of Ms. Simone Dominique Makinano, a third-year BSIT student under my advisory, for participation in the peer tutoring program. I have personally taught Simone in Systems Administration and Maintenance (IT-SYSADMN32), and I have received positive feedback from colleagues who handled her in Computer Networks (IT-NETWORK31) and Information Assurance & Security (IT-INFOSEC32).

In my class, Simone consistently demonstrated a deep understanding of server configuration, Linux administration, and virtualization concepts. What sets her apart is her ability to translate complex technical procedures into step-by-step instructions that her classmates can follow independently. Several students have approached me to commend her for helping them pass their laboratory practicals.

Based on my direct observation, I can attest to the following competencies:

- (1) Strong grasp of systems administration, networking, and cybersecurity fundamentals
- (2) Excellent verbal communication — she explains without jargon
- (3) Patience with struggling learners; she does not give up on them easily
- (4) Problem-solving mindset — she teaches students HOW to think, not just what to memorize
- (5) Leadership presence in group activities without being overbearing

I am confident that Simone will be an effective peer tutor. She possesses the rare combination of technical knowledge and genuine empathy that makes a great mentor. I highly recommend her for this role and fully endorse her application.

Should you need any further information, please do not hesitate to contact me.

Sincerely,

ENGR. JONATHAN M. REYES
